

THE GLEICHEN CALL

VOLUME XXXVIII NO. 5

GLEICHEN, ALBERTA, WEDNESDAY APRIL 18, 1945

SUBSCRIPTION \$2.00 PER YEAR

District Loan Quota \$100,000 Bond Salesmen Are Ready

With the objective of the eighth Victory Loan much higher than in any previous campaign, \$100,000 to be exact for this town and district, officials of the War Finance Committee have revealed that its sales organization is now geared to the peak of perfection for the campaign which opens on Monday. Many salesmen are ready to make a thorough canvass of the country endeavoring to seek out all prospective bond buyers. Every house in the town and country should be prepared to receive a visit from a Victory Loan salesman.

Realizing that there are quite a few people who have never bought a single bond since the war started they will be seen again by the salesman. As one prominent executive of the National War Finance Committee explained patriotic feeling rather than self interest will assure the success of the loan campaign. While the purchase of a bond is the act of a wise man building up a reserve for his family, it also affords him an opportunity of reaping the highest rate of interest compatible with the safety of his investment. The patriotic purchase of bonds at this stage of the war is absolutely necessary to

hasten victory.

Those who will do the canvassing are Wm. Somerville, G. W. Battie and W. Haggerty of Cluny. The Gleichen canvassers will be W. Blancy, A. F. MacCallum, T. H. Beach, N. T. Purcell and Miss F. Woods.

INQUEST FINDS INDIAN DIED FROM DRINKING WOOD ALCOHOL

The adjourned inquest into the death of Herbert Eagle Riba, Blackfoot Indian, who died on March 22 from drinking wood alcohol, was held in the Community Hall Monday evening by Dr. J. W. Giffin of St. Mary's.

Five witnesses were called. Dr. Wadsworth, who performed the autopsy, Peter Blackmore, James Wadsworth, Mary Red Morning, W. Service Dr. Farquharson.

Peter Blackmore and Wadsworth stated they had been with Eagle Riba and all had drunk wood alcohol mixed with soft drinks. Wadsworth did not take much of the drink and left the party. Blackmore stated he did not drink as much of the stuff as Eagle Riba. Some hours later he (Blackmore) became very ill.

After hearing the evidence, the jury which consisted of Messrs. T. H. Beach, W. Blancy, R. W. Brown, A. F. MacCallum, R. K. Howler and J. McQueen, brought in a verdict that Eagle Riba came to his death at about 4:30 a.m. on March 22 at the Blackfoot hospital, caused by drinking methyl hydrate.

FIRE PREVENTION WEEKS ARE EARLY SPRING AND FALL

Fire prevention weeks come principally in the early spring and fall of each year. They are vitally important periods in Alberta—more important than similar periods in any other province of the Dominion, for Alberta's greatest responsibility is to provide water flow for the most of Western Canada.

This can only be assured by the protection of Alberta's watershed on the eastern slope of the Rocky Mountains. The official responsibility of the Alberta government. But the job is too big for any government to manage alone without help. This responsibility must be shared by all residents of the province, particularly by those who live in the neighborhood of forested areas.

As stated on many previous occasions, forest growth conserves moisture which is supplied by nature automatically to rivers, streams and lakes. If the forests are burnt down, water flow is diminished and the result is a drought. Moisture is vitally necessary for the protection of life human, game and fish. It is vital also for the protection of all agricultural and industrial life.

Destruction of forests means the disappearance of this most important necessary to life and happiness, health and security. It means that the wheels of industry, which are so dependent on water flow, will be some impeded, that health and sanitation are endangered. These things

are protected if you protect Alberta's watershed by doing everything that is humanly possible towards the prevention of fire in forested areas throughout the province. That is the responsibility of every citizen of either sex and of any age. Care must be taken to see that a camp fire is properly extinguished before leaving it, that no match or cigarette stub must be carelessly thrown away, that farmers clearing brush, which is to be burned, must first plow a fire guard around it before ignition, and then watch such fires until the last spark is out. One single match or cigarette stub carelessly thrown away may start a fire which may cost perhaps loss of life, devastating countless square miles of richly wooded country and creating loss and damage which can easily run to a million dollars or more. We are in the period of fire prevention weeks now until rain and spring growth starts. It is a time for everyone to be on guard and protect Alberta's most vital and most important asset. One single match or cigarette stub may destroy miles of forest growth which would take a hundred years to replace.

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Fit and Mrs. Smith, R.C.A.F. will return to Montreal Thursday evening after spending the past two weeks with Mrs. Smith's parents, Mr. and Mrs. A. Horv, Blackfoot Reserve.

J. E. Ostrander of Calgary spent Monday in town looking after his property interests here. While in town he called on many of his old time friends.

Op. D. K. Schmidt, R.C.A.F. arrived in town Monday morning from Soudaboe, N. B. where he has been on official responsibility of the Alberta government. But the job is too big for any government to manage alone without help. This responsibility must be shared by all residents of the province, particularly by those who live in the neighborhood of forested areas.

Major W. Taylor son of Mr. and Mrs. E. W. Taylor returned from overseas on the early morning train Tuesday. Major Taylor has been overseas almost six years having left here in December 1938. His wife who lives in Okotoks met him in Regina last week.

The newly-weds had just got off their train.

"John dear," said the bride. "Let's try to make the people think we've been married a long time."

"All right, honey," was the answer, "you carry the suitcase."

Palestine citizens are trying to reach an understanding concerning Jerusalem mayors. One of the plans submitted suggests that each term be filled by, in succession, a Palestinian, an Arab and a Jewish mayor.

The closing hours of Canada's Nineteenth Parliament were subdued by the tragic suddenness of President Roosevelt's death. The loss of his leadership for the critical days ahead will throw an additional burden upon the statesmen of the world, and Canada's parliamentarians are fully aware of their own increased responsibilities.

The quality of the remarks made in the House of Commons when word spread to it via the East Block showed clearly the high regard Canadians had for President Roosevelt, and showed also their understanding of the contribution he has made to world stabilization.

The unexpectedness of the President's death overwhelmed many of the members, and the usual high spirits marking a dissolution were lacking. It was a more or less subdued Parliament that closed its doors and started along the rough road to re-election.

There are now 245 jobs available for public-spirited men and women and no Selective Service regulations involved. Many applications are already in, and the forecast is that something like 850 hopefuls are going to be in the queue. It is understood there will likely be quite a lot of pushing and shoving before the 245 lucky winners get their names on the successful section of Canada's payroll.

Many boasts about the prospects of the applicants are already current when the Reverend Tommy Douglas chirped that the C.G.F. would take 18 of Saskatchewan's 21 seats, he rounded nothing but hollow laughter from the Liberals and the Tories. The reaction was very much like the exchange of two stages just after parliament dissolved. "Well," after a hoarse cry. "We won't be seeing you around here anymore!" Quick as a flash a lively Liberal cracked back: "That's a lively Liberal crack back!"

The closing days of the nineteenth parliament were so crowded with notable events that no satisfying record could possibly be made in this small space. The air was electric with the high drama of really great impending developments. This tension and drama flowed out of the huge, high-ceilinged chamber and charged the atmosphere of the corridors, the members' offices, and the Cabinet Ministers' ante-chambers.

They even seeped into the beautifully appointed parliamentary restaurants, where some men gazed for the last time out of the windows overlooking the foaming Chaudiers Falls and swirling Ottawa River. Indeed the tension and drama were so powerful that members, well known for their disinclination to tell, flung folded money at the waitresses in an exuberance of spirits. It has been an exciting if short sixth session.

Highlighted, of course, was Prime Minister King's resolution on Canada's role in world peace organization, and the debate on it. Many far-sighted people are collecting the issues of Hansard going into debate, for it will be an outstanding piece of Canadian history in the years to come. The 222 to 5 vote was a most remarkable Liberal victory.

INCOME TAX AND HOGS

(By R. F. PRACHMAN)

Said a western farmer, a few days ago:

"I think that if the income tax was paid on hogs, or hogs could be raised income tax free, the government would get all the hogs it requires."

Individuals, groups or corporations are all of the same opinion in regard to their own product. It could be produced more economically, it could be sold at a lower price, the demand would be greater, were it not for the fact that taxes constitute a burden and the taxes must be paid.

We have for many years lived on the theory that a national expenditure meant increase of national income, regardless of how the money was spent. We may move forward

A Pledge
THAT STILL HOLDS GOOD

"We seek the Good of the Country" was the stated policy of the founders of The Canadian Bank of Commerce when the institution was established in May 1867, shortly before Confederation.

This has been the policy of the Bank through the long period that has seen Canada advance from a commercially small, poor country to a rich and powerful nation.

The Canadian Bank of Commerce

to a new age of thrift in which we face the income of the poor, stifles that consider what we get for our money—a not unimportant consideration! Where does this land those who are all out for high expenditures and felt they can thrive upon them? The half has not been told. We are inclined to welcome taxes when they were imposed mainly on the rich. Will we greet them with the same fervor when we find that there are limits to this process. It restricts capital investment. This again re-

The Minister of Finance of the Dominion of Canada offers for sale

Gleanings From The Capital

The post office department does a job that gets right into the home of every Canadian. Since the war that job has been tremendously increased, and at the same time skilled help has become scarce and motor, rail air, and ocean transportation has become short. In spite of that, gross postal revenue has risen from less than \$40 million in 1939 to over \$70 million in 1944!

The greatest increase in service apart from mail to the armed forces overseas—has been in air-mail. Three round transcontinental air mail flights are operated daily, and for every pound of air mail carried in 1939, more than four pounds are carried today.

Overseas mail to the armed forces has soared, too. In 1944 the post office sent sixty million letters and airgrams and 32 million pounds of parcels overseas.

Your nearest post office is one of 12,284 post offices across the country, and your post master or post mistress one of 37,000 employees. Canadian mail travels over 39,000 miles of railway, and 15,000 air miles.

Getting the mail through is a mighty job. But post offices do other jobs as well. They sell war savings stamps and certificates, and unemployment insurance stamps, conduct national registration, and issue ration books, gas ration and license tax forms. Canada's postal service is truly an integral part of the war effort.

There's going to be a market—and floor prices—for every pound of Grade A and Grade B poultry meat that can be raised this year. Reason? Canada has arranged to supply to the U.S. army her surplus up to 30 million pounds—and that's a lot of chickens. Prices have been agreed upon as follows: Grade A—milk-fed—30c per lb.; Grade A—28c; Grade B—milk-fed—28c; Grade B—26c; Grade C, 4 lbs. and up, 30c. So pamper your little pickers this year to help them make the grade. Don't destroy your cockerel chickens!

there's profit in every pound.

Village colleges serving as community centres in villages or towns, linked with the local secondary schools, have been recommended by one of Britain's post-war projects by the U.K. Ministry of Education. Activities would be social, recreational, and educational. A village hall in all communities of over 400 people, a full-time warden or organizer for any community centre serving 4,000 families, and facilities for all kinds of leisure activities are part of the plan. Says the report, touching on the question whether or not to have a tavern or bar in the centre, "The provision or otherwise, of alcoholic refreshment should be left to the community to decide."

Canada's cattle population nearly equals her human population, with 12,344,000 contented beasts chewing their cud on Canadian farms. Canadian farmers have been raising cattle for a long time—nearly 400 years. Jacques Cartier brought a few cows with him on his third voyage, and Champlain imported milk cows from France in 1610. Cattle were introduced into Acadia in 1632. Small wonder the Canadian farmer knows his dairy business.

\$12,000,000 has been earmarked for rural electrification in the province of Quebec. By a vote in the Quebec legislature a number of resolutions were passed authorizing the provincial government to spend \$12 million for bringing electric power to country homes.

LAUGH AND THE WORLD LAUGHS WITH YOU

Boy: "Say, whatever became of those old-fashioned girls who fainted when a boy kissed them?" Gal: "Huh! Whatever became of the old-fashioned boys who made them faint?"

Sgt: "Now what are we stopping for?"

He: "I've lost my bearings."

Sgt: "Well, at least you're original; most fellows run out of gas."

Sailor to lovely young thing: "Pardon me, but I'm writing a telephone directory. May I have your number?"

The old sarge was hawking out one of the soldiers for using so many flash light batteries.

SEEDLING AND HARVEST

DR. R. W. HEATY

Domestic Farm Service

GROWING SMALL FRUITS

We are pleased and proud to announce the publication of a bulletin entitled "Growing Small Fruits in the Prairie Provinces." It is illustrated with a series of admirable photographs most of which are by courtesy of the Division of Horticulture, Dominion Department of Agriculture.

The subject matter was written by Mr. W. R. Leslie, Superintendent, Dominion Experimental Station, Morden, Manitoba. It deals with recommended varieties, cultural and harvesting methods, pests and diseases of strawberries, raspberries, currants, gooseberries, and Tree fruits, such as apples, plums and cherries, are not included; but will, we hope, be the subject of another bulletin to be published in the near future.

Copies are available, free of charge, to farmers, and rural school teachers and pupils in the Prairie Provinces. They may be obtained through local Line Elevator agents, or from Line Elevators Farm Service, Winnipeg or Calgary.

A Correction

In our article, "Production Objectives," published on February 15th, we endeavored to summarize the figures released by the Dominion Department of Agriculture following the Dominion-Provincial Conference, their "increases," we quoted "cattle, 8%; calves, 10%." One of our correspondents points out that these particular figures relate to increased marketings rather than to production. He thinks that "the owners of cattle are generally of the opinion that production has reached a level in the prairie, where difficulties could easily arise—if extensive drought should occur."

"That do you use them for any how? It can't be in the line of duty," demanded the sarge.

"No, it ain't," answered the private.

"To tell the truth I take my flashlight with me when I go courting, just in case of a blackout."

"Well I'll be ——" exploded the sergeant, "you guys are dumb. Why, when I went courting, I lived on a farm and I never even carried a lantern."

"Yeh, Sergeant," replied the private, "and look what you get!"

HE HAS
Sacrificed
YOU
HAVE
Served

● You have reason for just pride if you have done all you could do, on the home front, to support the gallant effort of our men in active service.

If you have denied yourself pleasures and comforts to buy Victory Bonds; if you, too, have played a part in helping your country's war effort.

You have worked and saved and lent your savings to your country. Without this help from you; and from millions of her citizens, your country could not have maintained the prominent place she now occupies among the freedom-loving nations.

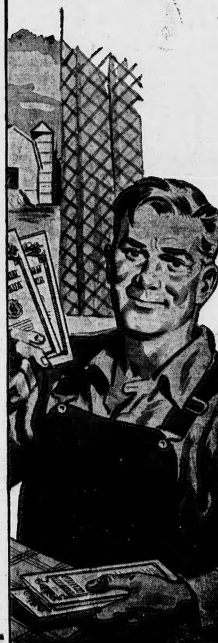

Canada has the use of your savings to help to win victory. (You will have this money to use for your own needs later.)

Perhaps you wish you could have done more. Well, you will be asked to do more. Men who have come back will tell you that there is lots to do yet. Canadians are on active service, on the fighting fronts. More money is needed to support their effort.

You are asked to keep on working and saving and you will be asked to put more savings into Victory Bonds. They are the best investment any Canadian can make; an investment that every Canadian should make.

Picnic

The Pick of Tobacco

A GREAT DEAL IS BEING SAID and written just now about the future. Everyone is aware that we are living in swiftly changing times, and that conditions will never again be as they were before 1939. There are definite signs pointing to some of the developments which will come with the return of peace. It is clear that social security is to be an important factor in the post-war economy, and it is also clear that events of the past five years have permanently altered former systems of international communication. These are only some of the changes which we know are imminent. There are other aspects of the post-war picture which are not so clear, and about which there is considerable speculation. While there is now no doubt as to the outcome of the war on the battle front, the political results are not so clear-cut and there are many points in this connection concerning which there are few definite conclusions.

Peak of Glory Believed Past

The British people themselves, in certain quarters, the opinion has been expressed, from time to time, that the British Empire has passed the peak of its glory, and that it will emerge from the present conflict as a "second class" power. In support of this argument, it has been pointed out that Russia, with a population of 200,000,000 people, and vast natural resources, appears to be just at the beginning of a period of great expansion, politically and industrially. There is also the United States, with 135,000,000 people, and likewise possessed of great natural wealth. The population of Britain is somewhat over 46,000,000, and in comparison to Russia and the United States, her natural resources are limited, as are her potentialities for increased industrial expansion.

Some Facts To Be Remembered

There are, however, other considerations which enter into any estimation of a nation's greatness, past or future. In the spectacular events which are marking the climax of the war in Europe, it should not be forgotten that the people of Britain carried on alone, in the critical period following the fall of France, and that had their courage and determination wavered then, the whole future of civilization would be quite different to what it is today. The people of the Empire have stood firmly together in this war, and have added much to an already long fighting tradition in all the services. For her part Britain has started a program for the improvement of social and economic conditions throughout the colonies, and has declared her intention of extending Dominion status to India at an early date. In science, invention and the arts the British people have shown that they are second to none, and British statesmen have for generations given the highest forms of wise and courageous leadership. Consideration of these, and kindred facts, leaves no room for thought that Britain's future will be less glorious than her past.

Farm Workers

Will Be Needed in the Winter Time For Essential Work
This Autumn and Winter, Canadian farmers are expected to help in the processing of products they have had a hand in producing during the summer months.

A Department of Labour spokesman made this statement recently commenting on the N.A.S. campaign to secure more than 100,000 men for work in essential Canadian industries. Meat packing, feed and flour milling are but two of the industries on the look out for men from the farms during their off-season. The largest group of farmers is being asked to work in the woods, cutting sawlogs, pulpwood and engaging in other forest operations. "Sixty thousand men will be needed for this wartime job alone," said the spokesman.

In Quebec and Ontario recruiting of men for woods operations commenced on October 1. In Manitoba, Saskatchewan, Alberta and British Columbia, men are being asked to leave their farms until threatening is nearing completion.

In Nova Scotia, Prince Edward Island and New Brunswick as soon as the potato and apple crops are harvested, efforts will be made to recruit workers for the season.

"The Minister of Labour announced the other day that last winter 100,000 men from Canadian farms answered their country's call," the spokesman pointed out. "This year as many or more willing workers are available than last year." He continued, "Whatever course the war in Europe may take 100,000 or more workers will be needed by Canadian industries."

HARD TO LEARN

After reading the advance copies of the new book, "The Art of the Automobile," we have a sneaking suspicion that the family jalopy is going to have a rough time of it after the war, says the Christian Science Monitor. It's going to take some time for the fellows to learn that automobiles are intended to be used on roads.

England was the birthplace of shortland.

Price Control And Rationing Information

Q.—Can I rent a gun for hunting and secure ammunition for it?

A.—No. Permits to buy small arms ammunition for hunting are available only to registered gun owners whose registration certificates are dated before Aug. 15, 1944. It is too late now to get a permit as they had to be secured before September 30.

Q.—Would you kindly list the contents of ration book 5 so that I can check over my book to make sure everything is in order?

A.—In your new ration book there will be one sheet of pink sugar coupons; one sheet of preserve coupons, gold-colored in color; two sheets of maize butter coupons; two sheets of "B" coupons; one sheet of lemon-colored "P" coupons; one sheet of black "Q" coupons; two sheets of blue "R" coupons; one sheet of green "S" coupons and one card marked "B.B." coupons. It is any error at all, mail or take your book right away to the local Ration Board.

Q.—Will there be any extra sugar allowed for the making of cakes and cookies for organizations sending parcels for Christmas?

A.—No. extra allowances of sugar are not made for such purposes.

Q.—Is there a ceiling price on a bicycle?

A.—Yes, used bicycles have a ceiling price and if you are planning on purchasing or selling a bicycle, it would be advisable to get in touch with the nearest War Relocation and Trade Board office to turn particulars will be given you.

Q.—I bought a used car about six months ago for \$200.00. I paid for this car in and buy another one. Could you tell me what price I could make out in a sale of this car?

A.—If you bought a used car only six months ago, you would be able for another one until January 1945.

Please send your questions or your remarks for the "Gleichen Call" to "Consumer News" or the Blue Book. The book will be sent to you if your question is of a general nature. If you are a member of the War Relocation and Trade Board office, you will be given a copy of the book.

Increase Tire Life

Development Of The New Heat-Tempered Air-Plastic Tire

Development of the new "heat-tempered" all-plastic tire—a step that eventually may greatly increase tire life—was announced by W. H. Punt, President of The Firestone Tire and Rubber Company of Canada Limited. The development is considered of major importance because the tire is designed to wear the number one enemy of long wear—heat.

This new tire has been developed in a new laboratory at Akron, Ohio plant. While the all-plastic air ultimately will be made of rubber, the new tire will not be known until the company completes the current laboratory examination and the grueling road tests to which the new tire will be subjected.

Experts agree that heat causes most tire failures and that great improvement could be rolled up if the problem were licked. Taking a long step toward achieving this goal, Firestone engineers built the all-plastic to run cooler than today's tires and to withstand twice the heat a natural rubber tire develops at high speeds.

This was done by thermosetting, or "heat-tempering," the plastic which went into the 6.00-16 passenger car tire. The "tempering" was achieved by adding certain materials to the plastic and applying heat. The Firestone all-plastic tire, which looks as much like a rubber tire as any other except that the difference, does not crack or check in the sun and, unlike rubber tires, it is not soluble in gasoline or oil.

How soon all-plastic tires, if they live up to expectations, will be available for civilian use is uncertain because all tire manufacturing facilities now are devoted to building military and essential civilian tires.

SUBS HAVE AIR MAST

A Berlin broadcast asserted a new U.S. technology would be available for an "air mast" which would allow submarines to remain under the surface 20 to 30 days or longer. "The mast permits the submarine to receive fresh air while submerged," Berlin said.

R.C.A.F. Awards

Canadiana Receive Distinguished Flying Crosses And Distinguished Flying Medals

A number of Canadians serving in the R.C.A.F. overseas have been honored in the latest list of awards released by Air Force headquarters. These fliers, serving in various capacities, have been rewarded for their courage and determination in the face of trying circumstances.

Squadron Leader L. G. Neilly of Gifford, Ontario, has been cited for his display of leadership in directing a search resulting in the rescue of 17 passengers of a plane forced down on the sea.

Flying Officer J. Wagnan, of Regina, Sask., was returning from a mission when his fuel tanks were holed by anti-aircraft fire and he was forced to bring his aircraft down on the sea 40 miles from the English coast. In spite of adverse weather and lack of landing lights he skillfully avoided a catastrophe.

Distinguished Flying Cross
Squadron Leader L. G. Neilly, son of Mr. L. A. Neilly, Gifford, Ontario.
Flying Officer J. P. Dees, son of Mr. F. C. Butler, Vancouver, B.C.
Flying Officer R. C. Penrose, son of Mrs. R. C. Penrose, Vancouver, B.C.

Flying Officer R. H. Simpson, whose wife, Mrs. A. I. Simpson, resides at North Bay, Ontario.
Flying Officer J. P. Dees, son of Mr. F. C. Butler, Vancouver, B.C.
Flying Officer R. C. Penrose, son of Mrs. R. C. Penrose, Vancouver, B.C.

Flying Officer R. H. Simpson, whose wife, Mrs. A. I. Simpson, resides at North Bay, Ontario.
Flying Officer J. P. Dees, son of Mr. F. C. Butler, Vancouver, B.C.
Flying Officer R. C. Penrose, son of Mrs. R. C. Penrose, Vancouver, B.C.

Flying Officer R. H. Simpson, whose wife, Mrs. A. I. Simpson, resides at North Bay, Ontario.
Flying Officer J. P. Dees, son of Mr. F. C. Butler, Vancouver, B.C.
Flying Officer R. C. Penrose, son of Mrs. R. C. Penrose, Vancouver, B.C.

Flying Officer R. H. Simpson, whose wife, Mrs. A. I. Simpson, resides at North Bay, Ontario.
Flying Officer J. P. Dees, son of Mr. F. C. Butler, Vancouver, B.C.
Flying Officer R. C. Penrose, son of Mrs. R. C. Penrose, Vancouver, B.C.

Flying Officer R. H. Simpson, whose wife, Mrs. A. I. Simpson, resides at North Bay, Ontario.

OUR COMPLETE SHORT STORY— In The Moonlight

By REGINA WAGNER
McClure Newspaper Syndicate

"Myrtle in bed!" Papa asked cheerfully, kicking at his old house slippers. Mama nodded vaguely, her eyes shifting away from her husband. Papa didn't notice it. He was pulling the sheet up about his head in the special way he liked. "She ought to be in bed early the night before her wedding," he murmured placidly. "Lucky girl, marrying Sam! I tell you he's the best catch in town."

Mama, in front of the mirror, began to brush her short grayish hair. After each stroke, she paused, frightened eyes staring into the glass and listened. She was afraid to tell Papa that she had left Myrtle on the porch for a minute—just a bare minute—and when she returned, Myrtle was not there. Mama was terrified. Myrtle might have gone off with that Ted Andrews whom Papa hated so. And on the night before her wedding to Sam Menruff, too! Mama's eyes grew more and more frightened.

Papa called impatiently. "Ain't you ever coming to bed?"

Mama, thus rebuked, pulled her shapless gown over her head and hurried through her other preparations. She went obediently to bed, but she was aware of every sound in the street below.

Where was Myrtle? Mama thought suddenly of the beautiful white wedding dress hanging in Myrtle's room. Mama remembered how Myrtle had looked when the dress was done at last, and put on. All white and soft and clinging. It was. Molded by Myrtle's own soft, slim shoulders. Pretty Myrtle! Mama had drawn her breath quickly when she had seen Myrtle in that dress. And yet there had been something—something—something. Nonsense, of course. Just Mama's silly notions. The dress was so beautiful. Like—a ray of moonlight.

Mama stirred nervously. Where was Myrtle? "If she stays away much longer, I will have to wake Papa and tell him," Mama moaned. Papa was snoring peacefully now. And he did hate Ted Andrews now. Sam! There was a boy! Still young—well, you couldn't call him old. What if he was fifteen years older than Myrtle? She was a baby; she needed a man with some sense to take care of her. Besides, look what Sam had, Papa said.

Mama raised herself on an elbow. A sound at last down there—an engine that wheezed and came to a sudden stop. That was Ted Andrews all right. Mama found that she had been breathing hard—just as she had when she tried to run upstairs.

She relaxed. Well, it was all right now. Myrtle wouldn't have had Ted bring her if she hadn't meant to do what her papa wanted her to. Everybody did as Ted wanted. Mama always had. For that matter, she wanted to see Myrtle well married.

Drive out ACHES

hereof. Riding around in that big car of Sam's instead of Ted's ramshackle old flivver, wearing the fine clothes that Sam could give her. Of course, Mama didn't hate Ted the way Papa did. That just showed, of course, that she wasn't as wise as he. Ted's front door was being opened gently. Mama listened contentedly to the familiar little squeak. Then there was silence—complete silence. Myrtle was saying goodbye to Ted Andrews. Funny that Myrtle liked him so much. Guess she was too much like her mama. Not smart like Papa.

Mama strained her ears. Once she heard a hard creak, and once the stairs rattled. But that wasn't Myrtle. "Why doesn't Myrtle close that door and come upstairs?" Mama slipped from the bed very, very quietly and crept to the window. There was Ted's car, disreputable even in the beautiful white light of the moonbeams. And Ted was standing leg beside it. Or was that Ted? It was Ted and Myrtle—pressed close in each other's arms. Mama felt their emotion, knew the sadness of it. Myrtle saying good-bye to Ted in the moonlight. Tomorrow she would marry Sam Menruff. That was right. Papa said so.

Mama watched them draw apart—so slowly, so reluctantly—and Mama saw that Ted had slipped out. She caught up Myrtle, swung her easily into the old car, jump in himself! Mama exclaimed with the surprise of it.

Papa was awake in an instant. "What's the matter?" he cried. He saw Mama at the window, and in a trice he was beside her. The sight of the old car starting up in the street below told him at once. With an angry yell, he jumped for his clothes. Mama ran out of the room. Her bare feet pattered down the stairs.

"I'll get them!" Papa was shouting. "I'll bring them back! The young fools!"

"The young fools!" Papa said at the foot of the stairs moved under Mama as she stepped upon it, and automatically she stepped to straighten it as she heard Papa start down.

"Move! Get out of my way!" Papa was yelling as he rounded the turn.

Papa would surely bring Myrtle back. Mama was as certain of it as she was that that tomorrow would dawn. Mama moved then, just in time to get out of Papa's way. And as she stepped aside, she gave the little rag a jerk—just enough to send Papa sprawling to the floor, shouting and clutching his back—just enough to be sure that he would be bringing Myrtle back tonight after all.

May Change Order

In Reference To Freezing Teachers On Their Job

A labor department spokesman said that it looks probable that the three-year-old order freezing teachers in their occupations will be lifted Sept. 1.

The spokesman said the proposal has been under consideration by the national selective service advisory council and the federal government has communicated with the provincial ministers of education, most of whom favored the suggestion.

"No final decision has been reached but it looks probable that the freeze will be lifted Sept. 1," he said.

The order, put into effect three years ago because of a shortage of teachers, prevents them from accepting any employment other than teaching.

BIRTHPLACE OF R.A.F.
Crawwell, the Sandhurst of Air where the R.A.F. was founded, has just marked its 25th anniversary, from a small group of army huts it has grown until it covers more than six square miles in Lincolnshire, England.

Have No Rank

Chaplains In Navy Equal To Men They Talk With

W. L. Clark, in the Windsor Star, says: Chaplains in the Navy have no rank and wear no rank badges. The padres are in naval uniforms and the cut of the clothes resembles the garb of a naval officer.

The idea of having no rank is that a naval chaplain always ranks equally with the man to whom he is talking. If the padre is with an admiral, then he ranks with the admiral; and, if the padre is with a rating, he ranks with the rating.

This plan of the Navy saves the men in the ranks the embarrassment of coming from talking to a commissioned officer. In the Air Force or the Army, it is sometimes necessary to have a non-commissioned officer act as an intermediary before a private can talk to God's representative. It may seem silly to be uninitiated, but some of the chaplains with commissioned rank are as snooty as a second lieutenant who has just put up his nose.

Some day, perhaps, the Army and Air Force will follow the example of the Navy and have the chaplains rank with all, no matter whether he is the lowest or highest.

Draw Extra Pay

Stokers And Cooks On Uganda Work Under Hard Conditions

Because of the tropical heat in which they have to work, stokers and cooks on H.M.C.S. Uganda will draw extra pay for their service in the tropics.

When the Uganda, Canada's first cruiser, crossed the equator on her 20,000-mile trip to Australian waters from a United States navy yard, the temperature in the engine rooms was 114 degrees. Under the dead head it was 140.

The medical staff under Surgeon Claude K. Thompson of Edmonton will have to deal with such nuisances as skin rashes. Salt tablets will be administered as well as yellow anti-malaria pills.

This Week's Pattern

By ANNE ADAMS

Practical hints to slim you, tuffen to make you pretty, button to faster briskly down the side. Pattern 4731 calls for easy sewing. Leave tuffen off if you prefer.

Pattern 4731 comes in sizes 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42. Each 16 3/4 yds. yards 35-inch.

Bent twenty cents (20¢) in extra (stamps cannot be accepted) for this pattern. Write plainly Give Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mail delivery of our patterns may take a few days longer than usual."

ADMIRAL EXECUTED
The Luxembourg radio quoted a Moscow broadcast as saying that Admiral Kurt Frick, chief of the German naval staff, had been executed because of his failure to "have the German ships lying in Danish harbours" during the recent campaign by Russian troops.

ALBERTA TEACHERS
Unanimous in their opinion the minimum salaries for qualified school teachers in Alberta should be set at \$1,200 if a labor draft in the profession is to be avoided delegates to the 19th annual convention of the Alberta Teachers' Association endorsed a resolution demanding substantial raising of the wage level be made effective.

League of Canada presents
TOPICS OF VITAL INTEREST

TUBERCULOSIS OF THE BOVINE TYPE AND UNDULANT FEVER

Tuberculosis of childhood, excepting the pulmonary type, is caused by contaminated milk. A careful survey of 352 tuberculous children in one United States city showed that 65 per cent. suffered from the bovine type. The source of infection in these cases was raw (unpasteurized) milk.

Some years after the introduction of compulsory milk pasteurization in Toronto, a survey revealed that the only children in hospital suffering from tuberculosis of the bovine type were from outside the city.

Most favored body points for tuberculous germs from raw milk are the lymph gland of the intestines and the neck glands. Tuberculosis of the bones and joints causes many crippling deformities.

A common disease in cattle is infectious abortion from germs called brucella. Goats, pigs and cows can be infected with these germs which they pass on to man, which cause undulant fever in adults.

Undulant fever is contracted by drinking raw milk from infected cows or through contact with infected animals or by handling infected meat. It also may be spread through cheese, butter and buttermilk. There are three strains of brucella with the one of pig origin the most virulent. When the disease is caused by this strain it is generally by name. Undulant fever derived from cow's milk is the mildest, and dead rarely occurs from this type.

However, cows sometimes are infected with a virulent strain that rarely kills, but causes death in calves, who are aged about four months when the disease is contracted. This strain is generally by name. Undulant fever derived from cow's milk is the mildest, and dead rarely occurs from this type.

Expressing his gratitude for his return home on the Swedish liner "Gripsholm," Mr. Allen writes that "Canadian parcels came to myself, British, American and Canadian gifts, five months before any American ones reached us, and since the Italian diet was extremely scanty and of poor quality, I think you know why I and others said nightly: 'Thank God for the Canadian Cans.'"

Smart Boy

Shows Great Presence Of Mind When School Caught On Fire

Attention should be drawn to a young gentleman of whom the world may count on hearing news. Master Peter Thompson McIntosh, a pupil at the preparatory school near Ender where a fire, involving four fatalities, took place last month. Young McIntosh, who was aged eleven and had been at the school just four days when the fire occurred, jumped from a roof on to some mattresses in his pyjamas. He then set off to call the fire brigade. No one told him to go (no he stated at the inquest on Monday) he just thought it would be a good idea. It was blowing a gale and snowing hard, but even in pyjamas he kept warm. He was a very brave boy, and his school (vires aquatici cundo). The first house he stopped at had no telephone, so he went on to the next building he saw. That turned out to be the fire station, so his work was done—London Spectator.

SELECTED RECIPES

SPICE CAKE
1/2 cup shortening
1/2 cup brown sugar
1/2 cup corn syrup
2 eggs, separated
2 cups all-purpose flour
2 teaspoons baking powder
1 teaspoon baking soda
2 teaspoons cinnamon
1 teaspoon nutmeg
8 cup sour milk
1 1/2 cups small raisins
Cream shortening; gradually add corn syrup and 1/2 cup brown sugar. Add well beaten egg, yolks, and 1/2 cup baking powder, soda, salt and spices. Add alternately 1/2 cup sour milk and 1/2 cup flour. Beat until stiffly beaten egg whites to which 1/2 cup brown sugar, four level tsp. 9" x 5" x 2" oiled with mazzola. Bake in moderate oven. Frost with caramel icing.

COANUT MACAROONS

1 cup white sugar
2 tablespoons cold water
1 tablespoon corn starch
3 cups coconut
Put sugar, water and corn syrup into saucepan, stir until thick, then boil without stirring until mixture spins a fine thread. To stiffen, add egg whites add corn starch, beat again until mixture peaks. Pour syrup slowly over egg whites, beating constantly until very fluffy, decreasing heat. Drop by spoonfuls on cookie sheet oiled with mazzola. Bake in slow oven. Yield 36 macaroons.

The Sear Group in Germany ranks as one of the foremost coal-mining and industrial areas in continental Europe.

Canadian Red Cross

How The Food Parcels Sent Weekly

Saved Many Lives

That the prisoner of war food parcels despatched overseas weekly by the Canadian Red Cross unquestionably saved thousands of lives is the expressed opinion of recently repatriated war correspondents who were taken prisoner in Italy in 1942.

Larry Allen, famous Associated Press writer and U.S. Correspondent British Mediterranean Fleet, in a letter to the Canadian Red Cross states unequivocally that it was the Red Cross food parcels "that meant the difference between life and death while I was imprisoned in Italy."

Expressing his gratitude for his return home on the Swedish liner "Gripsholm," Mr. Allen writes that "Canadian parcels came to myself, British, American and Canadian gifts, five months before any American ones reached us, and since the Italian diet was extremely scanty and of poor quality, I think you know why I and others said nightly: 'Thank God for the Canadian Cans.'"

Pray Of Crackers

Even The Smart Business Man Will

Get Fooled

Women with money are often the natural prey of racketeers who are handing phony stocks and shady deals, but you'd be surprised at how easy even smart businessmen get fooled. When they are, they don't tell about it and so even the cleverest friends don't know, but it is almost unbelievable that any man who has the brains to make money will invest in something which has nothing more to recommend it than a salesman's patter and promises.—Bulletin of the Crown Trust Co.

MAY BE SALVAGED

The London Daily Express reports the good news that among the big British liners that may be salvaged is the Canadian Pacific cargo ship Empress of Britain (\$2,000,000). The vessel was torpedoed and sunk in the Atlantic ocean west of Ireland.

Extra good and so different! This rich, brown loaf that heavenly milk-lake-cream, Kellogg's All-Brain Bran, makes every day of the light All-Brain texture perfect for the lunch boxes because it's packed with nourishment and is so convenient. Made by Kellogg, London, Canada. Helps keep you regular—

DON'T PUT OFF ORDERING YOUR COAL

Unless our Western coal mines have orders for coal, they cannot keep their men working. No men at work now means not enough coal for next winter. If you buy at once, you will be sure of having adequate heat in your home when cold weather comes again—and you will be more likely to get the kind of coal you prefer. Fill your bin at once.

Town & District

Mr. G. Bell, M.L.A., Mrs. Bell and daughter Ann, Mr. and Mrs. W. F. Belford were dinner guests at the home of Mr. and Mrs. N. A. Biddle Sunday.

Mrs. O. Woods and family left Monday for their home at Donald, Alta. After several weeks visit to the home of Mr. and Mrs. E. Woods.

Wm. Brown of Talbally Lake District pleaded guilty to a charge of "harboring a deserter" when he appeared in R.C.M.P. court Lloydminster, Alberta recently. Brown was sentenced to three months in Fort Saskatchewan Jail for the offence.

This spring is the one of the latest in recent years. Almost every night there is a heavy frost which shows out somewhat during the day. There is considerable frost in the ground yet.

S. Hampton is sporting a brand new dog these days. This dog is the color of brick and is the first red coated dog we ever remember being a resident of Gleichen. Mr. Hampton's dog is a pure bred Irish Setter and answers to the name of Champ. Dog owners in Gleichen are slowly but surely accumulating a bunch of high class animals of every breed and color. And each owner thinks he has got the only dog on earth. Some of the animals should be entered in some of the dog shows and the owners might get a surprise at the results.

With the event of spring, many thousands of farmers and farmers sons across Canada will be getting out the "22" rifle in the seasonal hunt for animals and birds likely to damage crops. Farmers may purchase small arms ammunition to protect their crops or their live stock against predatory animals or birds. First, they are required to take the registration certificate for their firearms to the nearest ration office. Then they will receive a permit for the purchase of the ammunition and this permit must be presented to the retailer from whom the purchase is made.

A fellow went into a restaurant and ordered a steak, but when the waitress brought it, it was terrible. "Look here," the customer exclaimed. "Take this steak back to the chef, and tell him I said to cram it down the manager's throat."

"Liar brother," said the waitress, "you got priority!" "Whaddya mean, priority?" barked the guest. "What's priority got to do with this lousy steak?" "Well, you know what you told me to do," answered the girl. "All I wanted to say was, there's a chicken and two orders of fish ahead of you."

The first air force pilot from the British dominions to lose his life in this war was Harold Bouskay, a Jewish flier from Johannesburg, South Africa. He died in the R.A.F. attack on Wilhelmshaven, Germany, on September 24th, 1939.

Netherlands East Indies are among the world's first producers of rubber. Before the war, Java alone had over 500 rubber industries.

The Dutch city of Surabaja, on Borneo Island, produces oil of such quality that in certain internal combustion engines, it can be used without retuning.

There are still well over 200,000 Jews in the Netherlands East Indies. Over 100,000 houses, representing one-fourth of Holland housing, have been bomb-wrecked.

CARD OF THANKS
 Mrs. Olga Woods and family wish to express their thanks to all who have been so kind to us during the loss of our dear husband and daddy. Mrs. Olga Woods and Family.

CANADA'S BANKING SYSTEM AMONG WORLD'S BEST

Because of the close tie binding Canada to both Britain and the United States, there is a tendency for us to compare their institutions and their industrial progress to our own. Both of these countries are so populous many times greater than ours; and are much more highly industrialized than Canada. For this reason it might be assumed that we should look to them for a pattern upon which to model new developments here. It is a fact that we have profited in this way in the past, and that we may again do so again. However, it should not be forgotten, that some of our finest achievements have been purely Canadian in character, and we may be justly proud of what has been done in this way. One of these achievements is our commercial banking system, which is known as being among the soundest and best organized in the world.

Bank failures or financial panics attributable to the banks have been unknown in Canada for many years. During the last depression our banks, under a great strain on all financial institutions, the Canadian banks remained firm and secure. In fact, only one bank failure has occurred in Canada since the last war, and that concerned a small bank whose collapse did not seriously affect the national financial structure. In that case, all note holders were fully repaid. Canada is served by ten chartered banks, operating on a national wide scale, and serving the various parts of the country by means of branches. These branches situated throughout the Dominion now number 3,000, and they are managed by men who are well informed on financial matters and also familiar with local business conditions. In every community the banks have played an important part in facilitating and encouraging expansion in business, agriculture, and industry.

During the war, this intimate knowledge of the financial and industrial life of the country has been placed by the banks at the disposal of the government. They have likewise offered their resources and services without reserve to assist with the war effort. In addition, valuable help has been given by the banks in the work of administering rationing, selling war securities, and carrying out financial controls made necessary by the war. Regulations concerning foreign exchange are also administered by the banks. In the difficult transition from a wartime to a peace-time economy which will soon be confronting us, the banks will again be in a position to serve the country. We have no reason to doubt that they will play an important part in the bringing us safely through that critical period, and that the Canadian banking system will continue to be one of our outstanding achievements.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF Henry E. Reimlin (Reimlin) late of the North Office of Gleichen in the Province of Alberta, Farmer, deceased.
 NOTICE is hereby given that all persons having claims upon the estate of the above named Henry E. Reimlin (Reimlin), who died on the 16th day of May, A.D. 1941, are required to file with the undersigned administrator by the 25th day of May A.D. 1945, a full statement duly verified of their claims and of any securities held by them, and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto, having only regard to the claims duly verified and proven. No claim or claimant has been so filed or which have been brought to his knowledge.
 DATED this 9th day of April 1945
 B. D. HENDERSON
 Acting Administrator of Estate of the deceased Henry E. Reimlin (Reimlin), Deceased, Provincial Building, Edmonton, Alberta.

It is seldom a good boy. If you can't find a dress that fits remember it's usually easier to alter a skirt than a waist.

The National Tuberculosis Association reveals, after a survey in North America, that death by tuberculosis can be thus divided: 29.3 100,000 among professional, 102.1 among skilled workers, and 184.9 among unskilled workers.

"This hired man can do most everything!"

There's a lot more than high quality tractor fuel in that familiar Imperial Oil drum... there's the ability to get almost any kind of farm work done in record time, with fewer men on the job. That's why Canadian farmers who own labour-saving power machinery look on Imperial Fuels and Lubricants as the equivalent of an extra, versatile "hired man".

Keep your equipment at top efficiency by using only the correct grades of Imperial Oil Fuels and Lubricants—brought to your door by your friendly Imperial Oil Agent. And place your order NOW... so that you may have the correct grades and quantities on hand when you need them.
